HT-H7730W

HOME ENTERTAINMENT SYSTEM

Give your living room a movie theatre-quality sound

With a stunningly expansive sound field and audio technology exclusive to Samsung, the HT-H7730WM home entertainment system delivers a sonic boom in home entertainment with a host of key features. Starting with an amplifier that gives listeners the best of two worlds – the warmth of analogue vacuum tubes and the power and efficiency of digital amplification. Discerning ears will appreciate the natural, full-range sound with virtually zero distortion. The system's Blu-ray disc player features Samsung's proprietary UHD Upscale Processor, which generates true-to-life pictures with vivid colours to match the resolution of your Samsung UHD TV. And the innovative multi-room wireless speaker solution provides users the ability to add an entirely wireless entertainment system as part their home audio network.

Multiple speakers, multiple rooms, multiple music

Now you can wirelessly connect your home entertainment system with every room in the house. Samsung's multi-room speakers can connect wirelessly to your HT-H7730WM and be easily controlled via the Multi-room app, available on your smartphone or tablet. Now you or anyone with the app can stream different music in different rooms. With Samsung's new multi-room solution, it's like having an integrated audio system distributed throughout your home.*

* Additional speakers sold separately

Go beyond HD and experience true, cinematic picture

A Samsung home entertainment system with a UHD Blu-ray disc player is the perfect companion to your Samsung UHD TV. Samsung's HT-H7730WM delivers stunning images in 1080p and can recreate a true cinematic-quality picture thanks in large part to its powerful processing engine, which can up-scale HD and Full HD content to UHD quality. This UHD up-scaling capability also means that you will be ready for the next generation of television viewing.

The way it was meant to be heard

Enjoy your movie scores and music through the deep, rich sound of vacuum tube technology. Digital and vacuum tube pre-amplifiers come together to provide both modern performance and classic sound. The combination of the two amplifiers creates truer, more immersive sound than digital alone. Couple the vacuum tube pre-amplifier with Samsung's virtual surround sound and you'll get a deep, powerful and clear listening experience.
